

- JAVA Emulator -

With **MobileRunner J2ME** from wap3 you can show your mobile applications to your customers. They can e.g. play a part of your most popular mobile games and can find out what great games you offer in the mobile world. The users play the demo game with the keyboard (spacebar and arrow keys) or via the joystick and the arrow keys on the phone image.

Benefits:

- MobileRunner J2ME is a web-based emulator that allows your customers to comfortably try out your JAVA games and applications on the computer.
- It can be easily integrated into your website or your partners' websites as a strong marketing tool in order to promote your mobile games and applications.
- Your customers can play a part of your most popular mobile games – limited by time or level
- Your customers can „try before buy“ your mobile games and applications directly on the web
- Can be hosted on wap3 or customer servers.

Supported web-browsers:

- Internet Explorer 5.0 - 6.0 and compatible;
- Mozilla 1.0 - 1.7, Firefox 0.8 - 1.0 and compatible;
- Netscape Navigator 7.0;

Compatibility:

- MIDP 1.0, MIDP 2.0; (e.g. Nokia S40, S60 ...)
- Client-Server applications HTTP support (HTTPS on request)
- Sound JSR135 (MIDI, WAV, AMR ...)

Maps ^{BETA}

[Home](#) - [Take a Tour](#) - [FAQ](#) - [Supported Devices](#) - [Discuss](#)

Give Google Maps a try using our interactive demo. Directions, search results, maps and satellite imagery will appear exactly as they would on your mobile device. (If you don't see a phone on your left, you'll need to download the JRE browser plugin. [Get it for free.](#))

To begin the self-guided Maps tour, just read the instructions below. If you'd like a wallet-sized walk-through, download our convenient [tips sheet](#). [pdf]

- ◆ Click on the phone's  and  buttons to open and exit the application menu. Menu options include [Find Business](#), [Move to Location](#), [Directions](#), and [Map/Satellite View](#).

- ◆ Use your keyboard's arrow keys, or  to scroll through menu items and move the map around.

- ◆ Hit Enter/Return on your keyboard, or click on  to select menu items and start/end addresses, and to zoom in. Click on "Zoom -" to zoom out.

- ◆ Type search terms, business names and locations with your keyboard.

- ◆ Move through menu items, search results and driving directions using 1-9 on your keyboard, or on the phone.

Like what you see? You can always download Google Maps by visiting www.google.com/gmm on your mobile phone's web browser. If you've got questions about whether Google Maps works on your phone, please feel free to consult our list of [supported devices](#).
